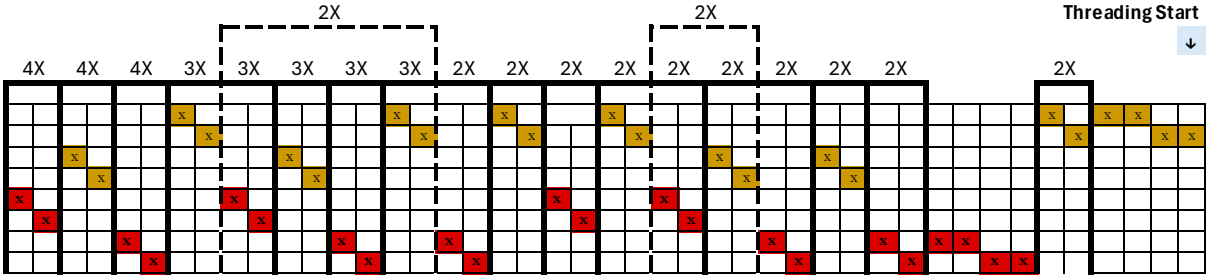
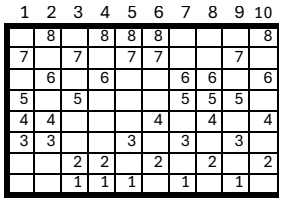
Projects: Emerging Asymmetry Scarf
Weave structure: Deflected Doubleweave Reed: 12 Sett: 24 2 threads per dent 8 shafts and 10 treadles
Source: Handwoven magazine Summer 2024 2 bobbins

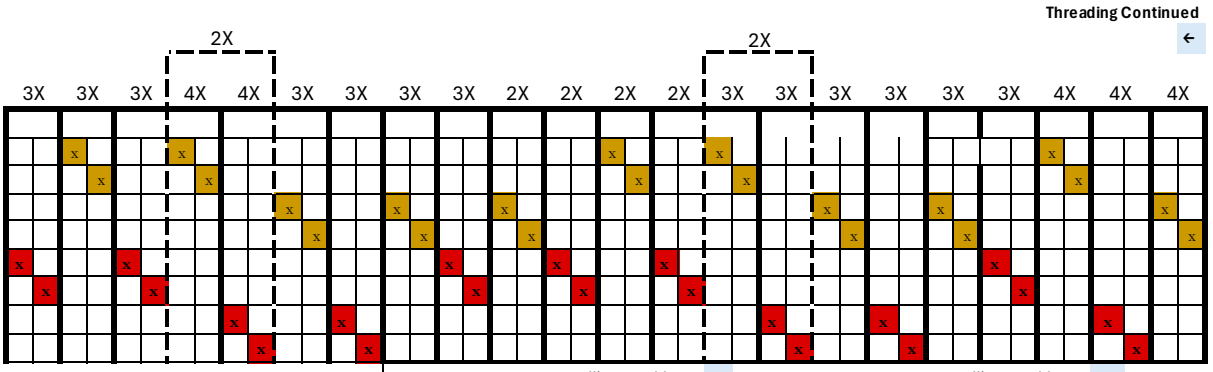
Scarf dimensions on loom: 13" width and 79" length (under tension)
Yarns: 20/2 cotton or silk, and 12/2 pearl cotton or 18/2 merino wool
Warp length: 312 ends, 3 yards long allows for 8" take-up and 21" loom waste
NO floating selvedge is recommended for this project

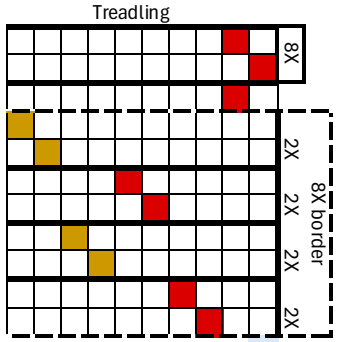
Heddle Count

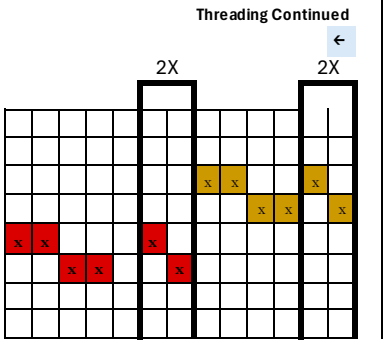
1	42	**4**	36	**7**	40
2	42	**5**	38	**8**	40
3	36	**6**	38		

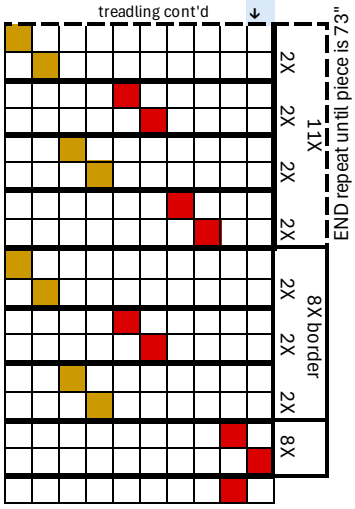


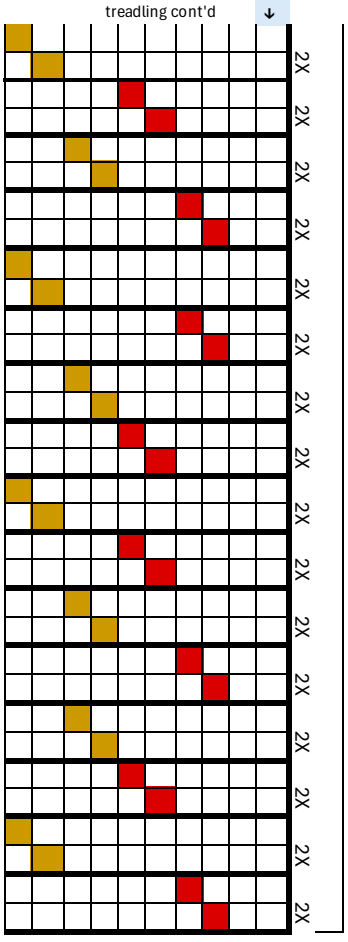


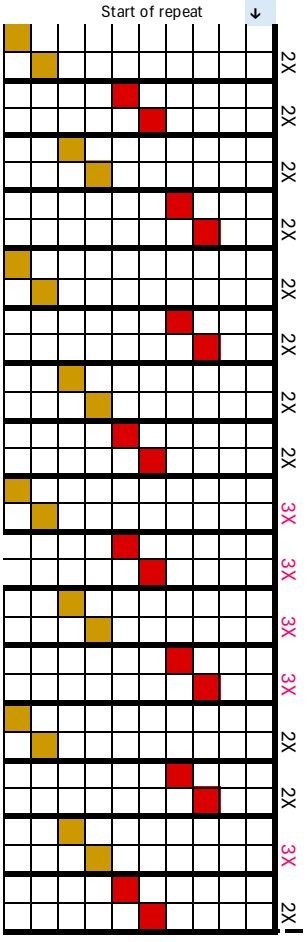












12/2 pearl cotton OR 18/2 merino wool
20/2 cotton or silk

Starting from the right side and leaving a tail, 1 yard long for hemstitching then weave 17 picks of plain weave. Use the tail to hemstitch in color groups of 4 or 6 warp ends.

Starting with the 20/2 cotton or silk, weave the border by starting the shuttle on the right side. Continue weaving the main patterned body until the scarf measures about 73". Weave the border from the treadling sequence, then add 17 picks of plain weave as instructed above. Leave a tail of 1 yard for hemstitching.

Leaving at least 2" for fringe on both ends, cut the fabric from the loom. Wet finish by your preferred method.
